

Fill & Finish Services

Sterile drug products – aseptically prepared

Wide range of molecules:

- Small molecules (including peptides)
- Nanomedicines
- Biotechnology products
(e.g. recombinant proteins, monoclonal antibodies)

Small to medium scale batch sizes

Clinical trial material (IMP)

—○ **Aseptic technology**
isolator with double sterile
filtration with PUPSIT

—○ **Formulation**
liquids (wide range viscosities)

—○ **Vial sizes**
2R and 10R

—○ **Storage condition**
-80°C – ambient

—○ **Filling technology**
bubble-free filling process
with 100% IPC

—○ **Container**
Glass vials with RayDyLyo push-fit caps

—○ **Batch size**
Up to 1000 vials

—○ **One-stop-shop**
Manufacturing labelling
certification & shipment

ARDENA

Bringing your molecule into clinic, on time and within budget.

Chemical & pharmaceutical development

Ardena is your one source contractor for the chemical and pharmaceutical development of your valued compounds.

Full analytical support

Ardena provides full product analytical and bioanalytical support during development. We support early and late stage clinical development projects, all in one seamless offering.

Dossier development

We provide full dossier development support. Our dossier centric approach makes a difference. We work with you to compile your regulatory dossier in parallel with drug development, saving you time, identifying hurdles and fast tracking your product towards compliance. We are experts in writing and formatting supporting CMC documentation.

Our services include

- Drug Substance Development & Manufacturing
- Solid State Research
- Drug Product Development & Manufacturing
- API & Nanomedicine
- Clinical Logistics
- Bioanalytics
- Dossier Development
