

Navigating you through
drug development

Accelerate Your Path to Preclinical Trials

Integrated Services for Drug Development

Unlock the full potential of your biotech innovations with our integrated platform for preclinical drug development. At Ardena, we bring together our expertise and trusted partners to provide a comprehensive solution that fast-tracks your journey to preclinical trials. With our tailored services in formulation screening, animal studies, and bioanalysis, we pave the way for new drug discoveries to thrive.

Accelerating Preclinical Drug Development: Integrated Services for Success

Partner with Ardena and our collaborative platform to bring your new drugs to preclinical trials faster than ever before. Our comprehensive services in formulation screening, animal studies, and bioanalysis pave the way for success.

Services

Drug Product Development and Manufacturing

- Generate and propose candidate formulation options
- Comprehensive screening of API solubility and selection of compatible excipients
- Pre-formulation development, testing, and screening
- Manufacture screening concepts for PK studies
- Offer expert recommendations on lead concepts for further development
- Provide detailed and comprehensive reporting throughout the entire process

Animal Testing

- Expertise in drafting and reviewing PK study protocols
- Guidance on species and administration routes
- Execution of precise PK animal studies
- Sample collection, storage, and handling
- Deliver detailed study reports

Bioanalysis

- State-of-the-art GLP-certified bioanalytical laboratory
- Analysis of small and large molecules (LC-MS/MS, ELISA, qPCR, Flow Cytometry)
- In-house development or transfer of phase-appropriate bioanalytical methods
- Analysis of PK and stability samples
- Interpretation of results and reporting
