drug development

# Leading the Way in Nanomedicine Solutions

From preclinical studies to commercialization, Ardena partners with you to develop customized nanomedicines that address the critical challenges of the healthcare industry.

Partnering with Ardena means partnering with over a decade of experience in the development and cGMP-compliant manufacturing of nanoparticles for medical applications.

## Why choose Ardena?

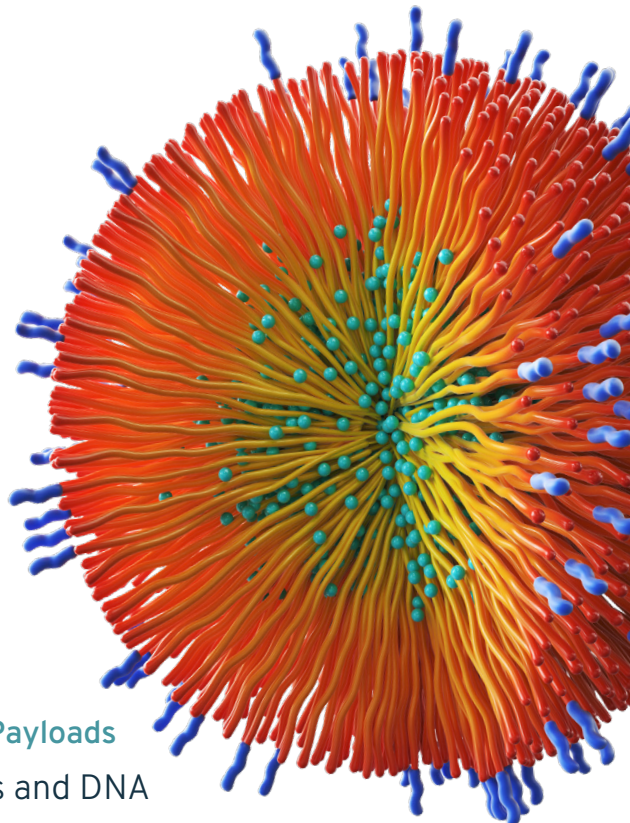

- Over a decade of experience in GMP manufacturing of nanomedicines
- State-of-the art facilities, including brand-new cleanrooms and aseptic fill and finish line
- Manufacturing capacity for a wide range of batch sizes, covering your needs from preclinical up to commercial manufacturing
- Specialized nanoparticle characterization technologies that provide deeper insight into particle formation mechanisms and product characteristics

ARDENA

## Our Expertise

-  LNPs, liposomes and lipid micelles
-  Polymeric nanoparticles
-  Metal and metal oxide nanoparticles

### Synthesis of Building Blocks

- Lipids
- Polymers
- Metal complexes
- Small molecules

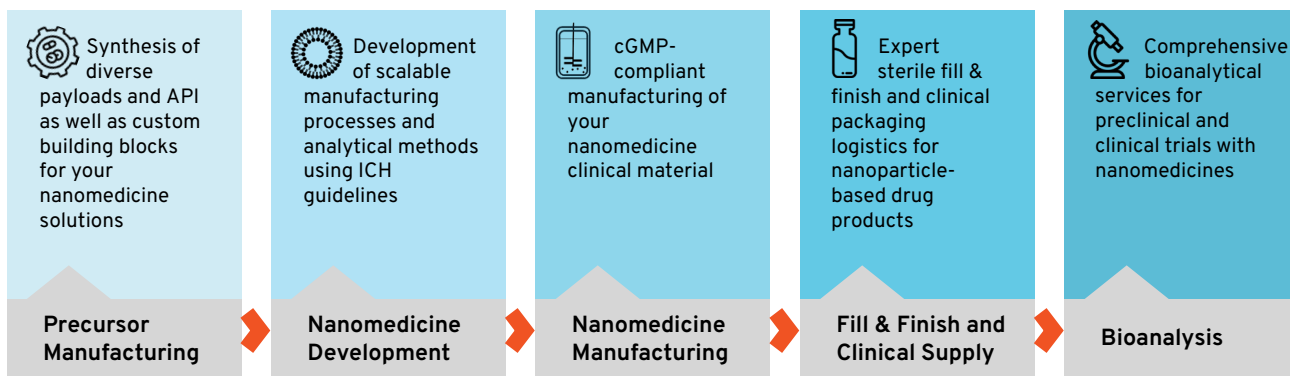

### Encapsulation of Payloads

- mRNA, oligos and DNA
- Small molecules
- Peptides and proteins

### Integrated Service Platform

At Ardena, we offer a fully integrated approach to nanomedicine development and manufacturing.

We enable our customers to meet their clinical timelines through our integrated service offering.

### Program Management and CMC Regulatory Support

Streamlined program management coupled with comprehensive services ensure smooth progression to clinical milestones

Contact us to discuss your nanomedicine project with our experts
