ARDENA

Public statement | Calendar year 2025 | Issued November 2026

2025 Greenhouse Gas Emissions & Waste

with people & governance highlights

This statement covers **all Ardena sites**, including Somerset, New Jersey (US), which joined Ardena in February 2025. Ardena has committed to the **Science Based Targets initiative (SBTi)** and targets a **reduction of absolute Scope 1 and 2 GHG emissions of at least 42% by end 2035** from a 2026 base year (Corporate EHS Policy AG-POL003), to be submitted to SBTi for validation.

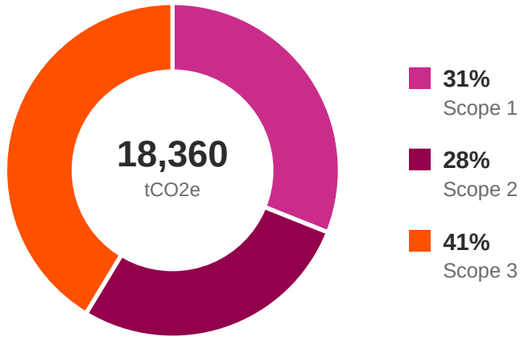

18,360
Total tCO2e

5,700
Scope 1 tCO2e

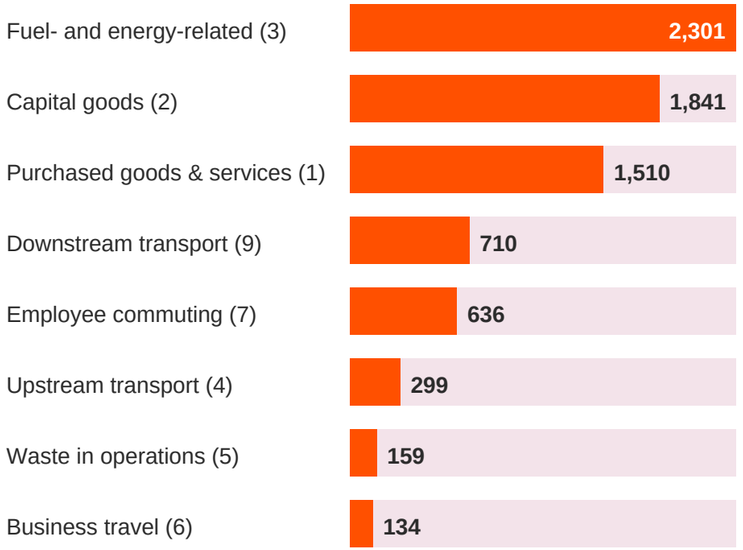

5,069
Scope 2 tCO2e (location-based)

7,591
Scope 3 tCO2e

Carbon footprint by scope

Scope 3 by category (tCO2e)

People & governance

49%
of our workforce are women

0
confirmed corruption incidents

0
confirmed information-security incidents

Energy

49,702 MWh
total energy use

18,701 MWh
of which electricity

92.8% renewable electricity – European sites

33.7% renewable electricity – all sites

12.7% renewable share of total energy

Waste

481.9 t
total waste generated

Zero waste to landfill at every site except Somerset (about 12.6 t of bulky waste in 2025); alternatives are being worked out with the site's waste hauler.

Scope and method

Boundary: Ardena Holding NV and its sites in Ghent (BE), Oss and Assen (NL), Pamplona (ES), Somerset (US) and Södertälje (SE; included for 2025, divested January 2026). **Method:** GHG Protocol; metric tonnes CO2e; Scope 2 location-based. Only electricity backed by cancelled Guarantees of Origin, up to each site's own use, counts as renewable; Somerset buys none today. The 2024 statement covered European sites and fewer Scope 3 categories, so totals are not comparable year on year. People and governance figures cover all 747 employees at year-end 2025. Figures are rounded.
